Startups with a minimum of \$1M each in funding

## Startups that trust us

## Technologies

React

Ruby

Angular Js

.Net

aws services

Azure

React Native

iOS

Android

## Engagement packages

### Starter Package

Every idea needs to be prototyped & reviewed before presenting it to a larger audience. Starter package allows startup founders to create a basic working prototype which can be presented before trusted audience to get feedback. Imaginnovate provides technology strategy & development services in this package

### MVP

A product should be tested in the market with  $\beta$  customers. Creating an MVP version of the product requires the startup founders to create a working version that could be taken to the market and put to test. This is more involved and possibly requires integration with other services depending on the nature of the product.

### Custom

You created an MVP and the product market fit has been experimented. At this stage you are ready to move forward in expanding the product features and positioned to take on the world. We have engineers to augment your team and scale cost effectively. We offer 20% discount to startups that are part of our accelerator partner network.

**We offer a 20% discount to startups that are part of our accelerator partner network.**
